

Made In America. Made Right.™

NAMED 2024 PRODUCT OF THE YEAR

Fastener
TECHNOLOGY INTERNATIONAL

ANCO® PN-LOC®

Lok-Mor® is pleased to announce that our proprietary structural locknut, the ANCO® PN-LOC®, was recently named a top product of 2024 by Fastener Technology International (FTI). FTI is an international technical magazine for fastener distributors, OEMs, and other interested parties, publishing technical articles, trade show previews, and product news across 90 different countries.

THE ANCO® PN-LOC®

Our proprietary structural locknut, the ANCO® PN-LOC®, features an unbreakable stainless-steel pin and a unique locking indentation to ensure consistent locking torque every time. This locking mechanism also minimizes damage to the bolt threads and any galvanized surfaces.

The ANCO® PN-LOC® is designed to endure high-vibratory environments and prevent loosening under dynamic loads. This advanced locknut is ideal for industrial

applications in which safety and reliability are paramount, such as in construction, transportation, heavy machinery, rotating equipment, and shipbuilding.

The ANCO® PN-LOC® is manufactured in a wide range of sizes, materials, threads, and finishes at our headquarters in Mansfield, Texas. As part of the Lok-Mor® commitment to quality, our locknuts are tested in an A2LA-accredited quality assurance lab. The unparalleled quality of Lok-Mor® products like the ANCO® PN-LOC® undoubtedly contributed to its recognition by FTI. We look forward to continuing to set the industry standard for domestically manufactured locknuts and ensuring that each one is Made in America. Made Right.™

Since 1982, Lok-Mor has set the standard for domestic locknut selection and quality. The company manufactures and stocks more than 20 different locknuts to meet a wide range of applications. To ensure the highest quality standards and a ready supply of locknuts, all manufacturing processes, locking, and testing are completed at the company's facility in Mansfield, TX.
